

*“We recognize that brand differentiation is an important element of your business. To satisfy that need, we have an in house engineering team which will custom design controls in concert with your engineering group”*

## QUANTEM CORPORATION IS A MANUFACTURER AND DISTRIBUTOR OF ELECTRONIC TEMPERATURE CONTROLS AND RELATED ACCESSORIES

*We manufacture all Quantem products in our New Jersey facility. We use state of the art manufacturing processes for surface mount and through hole electronic assembly. Most of our products are RoHS compliant. Quantem’s product line can be segmented into four major categories: stock controls, custom controls, temperature sensors and Evco controls.*

*All four segments of Quantem serve a customer need, however our custom*

*controls is an area where we truly differentiate ourselves from the majority of suppliers. We recognize that brand differentiation is an important element of your business. To satisfy that need, we have an in house engineering team which will custom design controls in concert with your engineering group. The result is a unique control that will not be marketed to your competition or the end user. The final product will be economically produced in our New Jersey facility.*

### stock controls

**DESIGNED AND MANUFACTURED BY QUANTEM, THESE ARE “ONE SIZE FITS ALL”**

These are typically low end electronic thermostats used in heating and cooling applications.

Stock products will accommodate minor adjustment to meet specific applications, but are mainly simple designs which are commonly used in commercial cooking equipment.

### custom controls

**CUSTOM CONTROLS FALL INTO ONE OF TWO CATAGORIES:**

Standard generic existing platforms that are custom programmed to your specific application.

Newly designed controls which do not exist until they are designed and specified through a joint team effort between Quantem and the customer.

### temperature sensors

**MANUFACTURED IN OUR NEW JERSEY FACILITY**

These can be fabricated to your specifications, or designed by our engineering department to meet your requirements. RTD, thermocouple, NTC/PTC thermistors are available. Some products are available directly from stock.

### evco controls

**MANUFACTURED BY EVCO AND DISTRIBUTED BY QUANTEM CORPORATION**

These provide a wide range of products which are both panel mount and sub panel mount. The product line contains a full offering of user configurable controls and accessories for use in both heating and cooling equipment.
