

Series 160 with 3.2" QVGA Touch Screen

MADE IN THE USA

Series 160 UIF Tactile

General Description

The Series 160 UIF—Touch Controller offers the user a touch panel interface which is fully customizable for a specific OEM application. The low cost controller less architecture provides for rapid screen refresh while keeping the cost to a minimum. The bright 320 x 240 display has 8 bit color and is 3.2" QVGA.

The S160 UIF Touch interfaces with the Series 160 MIF, so it is feature rich with IO channels.
